Contact No.: +91- 8107459401

Product Leader with 10+ years of experience building and scaling digital health solutions for consumers, enterprises, governments, donors and healthcare systems.

Led Nikshay, Government of India's TB platform serving 2.6M+ patients, scaled Everwell Hub across 16+ countries in partnerships with BMGF, USAID, and KNCV. Founded HappiNest, India's first maternal mental health platform.

Core Competencies:

- Product strategy & execution at scale
- SaaS & platform thinking
- Zero-to-one and scale-up experience
- Cross-functional leadership (PM, design, eng)
- GTM & growth experimentation

PROFESSIONAL EXPERIENCE		
HappiNest, Bengaluru	Founder & CEO	(October 2023 – Present)
• Founded HappiNest, India's first parental mental wellbeing platform, bootstrapped to profitability with paying customers. • Built and led a cross-functional team of clinicians and marketers, managing hiring, operations, and team development. • Drove growth through performance marketing, customer acquisition and brand building with limited resources. • Owned unit economics, pricing, partnerships and revenue strategy, ensuring sustainable business scaling.		
Everwell Health Solutions, Bengaluru	Principal Product Manager	(April 2022 – March 2024)
• Led three major product verticals: Everwell Hub SaaS (international deployments), Nikshay TB platform (Govt of India), and Aaro Health digital therapeutics. • Managed and mentored a team of 5 PMs and designers, overseeing hiring and career growth. • Represented product vision and strategy at executive reviews, health conferences and donor meetings. • Securing and planning engineering resource allocation by showcasing product results and strategies in quarterly CXO reviews and internal forums. • Directed Aaro Health's end-to-end product development and GTM strategy focused on allergy and asthma management, including key features like predictive health algorithms, lung health diary and customer engagement frameworks.		
	Senior Product Manager	(April 2020 - Mar 2022)
• Led Everwell Hub, an open-source patient management platform supporting TB, HIV, Mental and Maternal health programs across 16 countries. • Revamped the platform into a streamlined SaaS solution with an admin setup reducing client deployment time from two weeks to half a day, enhancing user experience and cutting costs.		

- Delivered key features including teleconsultation, language customization, adverse event reporting, configurable country hierarchy management, multidrug regimen oversight and integrated adherence modules like patient self-verified adherence, video-observed therapy and MERM box integration. - Managed Nikshay TB platform with 2.64 million active patients, partnering with government and donors to identify pain points and release enhancements including data dashboards, staff follow-up task lists, adverse reaction reporting, teleconsultation, active case screening and AI-powered diagnostic tools. - Championed platform-thinking by building reusable microservices for communication (SMS, push, IVR, WhatsApp), adherence management and hierarchy management, significantly boosting scalability.		
Future World Studios, CA	VP of Product Management	(Sep 2019 - Mar 2020)
- Led the product development for immersive Virtual Reality solutions in the space of healthcare. Identified opportunities and developed strategies for introducing new product lines to advance physician training and making complex procedures less stressful for patients. Led India back office and oversaw day to day operations.		
eKincare, Hyderabad	Product Manager	(Feb 2017 - Aug 2019)
- Managed concept to launch of Progressive Web App. - Built a recommendation engine tailored to user journeys, launched telemedicine and condition management programs for pregnancy, smoking cessation, diabetes and hypertension and drove user engagement through wellness challenges and referral rewards. - Managed platform integration with Reliance Jio for large-scale rollout and led partnerships for third-party integrations including pharmacy, gyms, and EAP solutions. - Led redesign of the HR web application to improve functionality, user experience and data dashboard for critical employee health metrics. Streamlined client onboarding processes, reducing setup times and enhancing operational efficiency. - Developed a feature activation system enabling clients to access product features based on pricing tiers. - As the first product manager at Celes Care (acquired by eKincare in 2017), revamped the Android app, defining features and delivering pregnancy, period, and BMI trackers.		
Portea Medical, Bengaluru	Assistant Product Manager	(Feb 2016 - Feb 2017)
Launched three successful specialized product divisions under nursing service including Homecare for IVF Patients, ICU at Home and Cancer Care Program. - Established the pricing model and structure for nursing service and defined the profitability matrix for the business team. Increased the revenue for business unit by 185% within a year. Prepared customer engagement activity calendar and launched monthly campaigns for increasing customer engagement and lifetime value. Worked on employee engagement, retention and training programs to improve retention, work satisfaction and bring down customer complaints.
